INDEX VOLUME 33 1987

A

Acorn RISC Machine — an architectural view by S.B. Furber and A.R. Wilson 402
Advantages of wave power (letters) 431, 545
Advent of the android (letter) 304
Andonovic, I., Shabeer, M. and McDonach, A.: (see McDonach) 709
Android, advent of the by M. Duggan 199
Artificial intelligence, but natural language by Philippa Logan 66
Ashby, J.: Radar technology — where next? 445
Aspden, H.: Space navigation and ether (letter) 170
Atkinson, W.C. and Ellis, F.E.: Electricity distribution — asset-replacement considerations 337
Automation, implementing flexible by R. Dalby 514
Avionics, integrated, for 'Nightbird' Harrier by R. Mason 451
Ayres, E.W.: Advent of the android (letter) 304

B

Baden Fuller, A.J.: Screw tightness (letter) 431
Bad news (letter) 233
Baker, H. and Wilson, I.O.: Mineral-insulated cable — the inorganic solution 268
Baker, W.F. and Bindon, F.J.L.: Faraday Lecture (letter) 232
Barnes, N.: Generating costs (letter) 20
Barnett, P.: Changing trends in the design of uninterruptible power supplies 457
Battery market, trends in the by B. Russell 508
Beckett, Sir Terence: Innovation in the 21st century 26
Bell, D.A.: British manufacturing industry: an independent viewpoint (letter) 19
Bell, D.A.: Seizing opportunities (letter) 304
Bell, R. and Robertson, S.S.J.: HSE guidance on the use of PESs 123
Bennell, F.T.: Ohm's Law (letter) 19
Bennell, F.T.: Ohm's law (letter) 304
BiCMOS — getting the best of both worlds by R. Dettmer 499
Bingley, P.: Standards and compliance (letter) 21
Blachman, N.M.: Mathematical expressions (letter) 491
Blacklock, T.: Connectors go to the extremes 390
Blower, R.W.: New technology for secondary distribution systems 329
Boldick, T.: Setting standards as business aids 584
Borner, R.: 3D TV projection 379
Borrill, P.: IEEE 896.1: the Futurebus 628
Bowden, P.R.: Special theory of relativity (letter) 171
Britain's future business — a view from the TUC by Norman Willis, TUC General Secretary 28
British manufacturing industry: an independent viewpoint (letter) 19
Broadcasting to the future by J.R. Forrest 721
Brummitt, B.: Electromagnetic waves and ether (letter) 171
Buchanan, R.J.: Engineers who are not (letter) 492
Business aids, setting standards as by T. Boldick 584

C

Cable jointing — a dying art by E.W.P. Jones 180
Caroline Herschel — seeker of comets by Glenis Moore 176
Carpenter, B.E.: Neutrinos and basic research (letter) 545
Carter, R. and Cooke, F.: An accelerated experience course in project engineering 101
CATE — a software toolset for VLSI test generation by R. Dettmer 307
Catto, C.J.D.: Use of vehicle shells in a factory environment (letter) 172
Certified generator core condition monitor by D. Gunton 265
Chapman, G.C.: Three cheers (letter) 20
Chips for graphics — making the pixels fly by R. Dettmer 187
Ciphers, cracking the by Prof. Sir Harry Hinsley 453
Clarke, G.G.: Three more cheers! (letter) 170
Clarke, L.: Collaboration — necessity or illusion? 47
Classification of hazardous areas (letters) 432, 545
Clery, D.: SDI technology — too far, too fast? 437
Clewes, A.B.: RFI/EMC shielding in cable connector assemblies 741
Cohen, Prof. B.: Education of the information systems engineer 203
Collaboration — necessity or illustion? by L. Clark 47
Communications hierarchy for the factory by K. LeFebvre 192
Communications network, the CEGB corporate by Bob Davies 551
Communications, secure, technology in by C. Graham 557
Compliant pin technology by A. Meller 387
Computer-aided design education by D. Lewin 255
Computer-based evaluation of utility load measurements by S. Lovett 130
'Computerspeak' (letter) 491
Computing at the speed of light by A. McDonach, I. Andonovic and M. Shabeer 709
Connections, improve your by G. Woods 389
Connectors go to the extremes by T. Blacklock 390
Connector technology, developments in by J. Hamilton Dutoit 383
Continuing education and training — the need for action by D.H. Roberts 539
Control systems, computer, new developments in by R.L. Miller 577
Cook, D.: Primary lithium power sources 511
Cooke, F. and Carter, R.: (see Carter) 101
Cooper, T.R.: Faraday Lecture (letter) 99
Crabtree, D.W.: Not so powerful waves (letter) 617
Crew, E.W.: Mathematical expressions 304
Crew, E.W.: Theory of tides (letter) 687
Crew, E.W.: Tides (letter) 491
Crosstalk 18, 98, 122, 168, 232, 303, 367, 432, 617, 686, 745

D

Dalby, R.: Implementing flexible automation 514
Dating techniques in archaeology — Setting a date by Glenis Moore 137
Davies, Bob: The CEGB corporate communications network 551
Davies, D.E.N.: University funding for electrical engineering departments 611
Derwent, M.: Greek symbols in SI (letter) 233
Design, progress in quality and by K.K. Schwarz 133
Dettmer, R.: BiCMOS — getting the best of both worlds 499
Dettmer, R.: CATE — a software toolset for VLSI test generation 307
Dettmer, R.: Chips for graphics — making the pixels fly 187
Dettmer, R.: Logic programming or how to make computers more thoughtful 109
Dettmer, R.: Reflections of a computer pioneer 717
Dettmer, R.: Saving British science 55
Dettmer, R.: Silicon on insulator — the PCB on a chip 272
Dettmer, R.: STE goes up the wall 637
Dettmer, R.: The rise of the workstation 560
Digital signal processing in the UK by J.B.G. Roberts 183
Disease, following the tracks of by Glenis Moore 496
Distributed control systems by T. Pauly 573
Distribution-system protection — the way ahead by P. Rosen 333
Distribution systems, secondary, new technology for by R.W. Blower 329
DMC/PC '87 Exhibition preview 659
Downton, A.C.: Engineering the man-machine interface 691
Duggan, M.: Advent of the android 199
Dutoit, J. Hamilton: Developments in connector technology 383
Dymond, R.: Cheap energy for Ulster? 653

E

Ebb and flow (letter) 305
Education of the information systems engineer by Prof. B. Cohen 203
Edwards, R.: Microcomputer buses 624
Electrical safety — the need for expert advice by S.S.J. Robertson 225
Electricity demand, meeting future by R. Livingstone 645
Electricity distribution — asset-replacement considerations by W.C. Atkinson and F.E. Ellis 337
Electromagnetic pulse, the nuclear by J.S. Forrest 443
Electromagnetic waves and the ether (letters) 22, 171
Electronic publishing — a revolution in the printed word by Glenis Moore 695
Ellis, F.E. and Atkinson, W.C.: (see Atkinson) 337
Energy in Australia by P. Greenwood 258
Engineering the man-machine interface by A.C. Downton 691
Engineering with a capital 'E' by E.R. Laithwaite 679
Engineers and pay (letters) 19, 169, 233, 368
Engineers who are not (letter) 492
European spaceplanes — Hermes, Sanger or Hotol? by Glenis Moore 252

F

Faraday Lecture (letters) 99, 169, 232, 304
Father of the robot (letter) 232
Ferguson, J., Lewis, G., Jackson, R. and Gibbon, R.: (see Jackson) 641
Ferranti's cables (letter) 617
Ferranti, Sebastian Ziani de, 1864-1930. Pioneer of electrical power systems by K. Williams 493
Fibre-optic links, designing by W. Wiesner and C. Lewis 699
Forrest, J.R.: Broadcasting to the future 721
Forrest, J.S.: The nuclear electromagnetic pulse 443
Forth — not a computer language but an engineering tool by P. Sykes and C. Stephens 323
Fountain, V.A.E.: Father of the robot (letter) 232
Fox, A.L.: Gallium arsenide versus silicon for digital applications — a user's view 245
Fuel cell development and prospects for the future by D. Pollard 502
Furber, S.B. and Wilson, A.R.: Acorn RISC Machine — an architectural view 402
Futurebus, the, IEEE 896.1 by P. Borrill 628

G

GaAs monolithic microwave integrated circuits by K. Wilson 249
Gallium arsenide, high-speed, for digital integrated circuits by R.P. Merrett 241
Gallium arsenide versus silicon for digital applications — a user's view by A.L. Fox 245
Gallois, Paul: Life expectancy of communication satellites 547
Garrard, C.J.O.: Engineers and pay (letter) 19
Gaythorpe, R.S.: Screw tightness (letter) 687
Gaythorpe, R.S.: View from abroad (letter) 617
Generating costs (letters 20,170
Gibbon, R., Ferguson, J., Lewis, G. and Jackson, R.: (see Jackson) 641
Graham, C.: Technology in secure communications 557
Greek symbols in SI (letter) 233
Greenwood, P.: Energy in Australia 258
Grey, R.: Special theory of relativity (letter) 21
GRIP — a parallel processor for functional languages by S.L. Peyton Jones 633
Gunton, D.: Certified generator core condition monitor 265

H

Harrett, T.: Electromagnetic waves and the ether (letter) 171
Harris, W.P.: UPS systems — static or rotary? 465
Hazardous areas, classification of by P. Palles-Clark 262
Herdan, B.: Commercial exploitation of military research 59
HF transmitters, developments in the design and performance of by J. Wood 392
High definition — the technical challenge by T. Robson 105
Hinsley, Prof. Sir Harry: Cracking the ciphers 453
Hockmeyer, I.O.: Ohm's Law (letter) 686
Hoggarth, N.J.: Electromagnetic waves and the ether (letter) 171
Howes, M.J.: Microwave solid-state engineering in the UK 115
HSE guidance on the use of PESs by R. Bell and S.S.J. Robertson 123

I

Industrial decline and the status of engineers (letters) 169
Industrial news 11, 93, 160, 226, 293, 361, 423, 486, 540, 612, 680
Ingrey, A.: Industrial process control strategies 567
Innovation in the 21st century by Sir Terence Beckett 26
In place of efficiency (letters) 21, 431
In Retrospect 22, 99, 172, 234, 305, 368, 432, 492, 546, 618, 688
Integrated project support environments by P. Mair 317

J

Jackson, R., Gibbon, R., Ferguson, J. and Lewis, G.: Supergrid condition assessment 641
Japan syndrome. Part 1: The new sunrise by F. Oakes 580
Japan syndrome. Part 2: The Japanese manufacturer and his society by F. Oakes 619
Japan syndrome. Part 3: The way ahead by F. Oakes 735
Johns, A. and Marshall, P.: In place of efficiency (letter) 21
Jones, E.W.P.: Cable jointing — a dying art 180
Jones, I.C.: Power-station memories (letter) 20

K

Kelly, M.: The need for strategic research in industry 51
Kenchatt, R.F.: Ferranti's cables (letter) 617
King, A.C.: Electromagnetic waves and the ether (letter) 171
Kipnis, L.: Classification of hazardous areas (letter) 432
Kitchenham, Barbara, A.: Controlling software projects 312
Knowledge, the pursuit of 359

L

Laithwaite, E.R.: Engineering with a capital 'E' 679
Lander, J.E.: Bad news (letter) 233
Laverick, Elizabeth: From MAP to AMIE — the IEE's contribution to advanced manufacturing techniques 195
Lawson, W.N.: Classification of hazardous areas (letter) 545
Leach, T.: Test and measurement — developments and trends 127
LeFebvre, K.: Communications hierarchy for the factory 192
Lewin, D.: Computer-aided design education 255
Lewis, C. and Wiesner, W.: (see Wiesner) 699
Lewis, G., Jackson, R., Gibbon, R. and Ferguson, J. (see Jackson) 641
Lidgate, D.: Sizewell: to B or not to B a PWR? 237
Lithium, primary, power sources by D. Cook 511
Livingstone, R.: Meeting future electricity demand 645
Logan, Philippa: Artificial intelligence, but natural language 66
Logic programming or how to make computers more thoughtful 109
Long, D.: Compatible WP (letter) 688
Lovett, S.: Computer-based evaluation of utility load measurements 130
Lucas, S.: Mind your language (letter) 431
Lynch, A.C.: Silvanus Thompson — teacher, researcher, historian 173

M

Mair, P.: Integrated project support environments 317
Malcolm, B.: Safety-critical puddings 291
Management, young engineers and by P. Walmsley 517
MAP to AMIE, from, the IEE's contribution to advanced manufacturing techniques by Elizabeth Laverick 195
Marsden, L.: Screw tightness (letter) 491
Marshall, P. and Johns, A.: In place of efficiency (letter) 21
Marshall, R.C.: VDUs and health (letter) 617
Martin, B.R.: The structure and funding of UK research — a statistical overview 31
Mason, R.: Integrated avionics for 'Nightbird' Harrier 451
Mathematical expressions (letters) 304, 491
Mattos, P.: Applying the transputer 397
Maylin, R.F.: Advantages of wave power (letter) 545
McDonach, A., Andonovic, I. and Shabeer, M.: Computing at the speed of light 709
McGhie, T.V.: Greater switchboard safety — the manufacturer's response 731
Mears, M.: Ebb and flow (letter) 305
Meller, A.: Compliant pin technology 387
Merrett, R.P.: High-speed gallium arsenide for digital integrated circuits 241
Microcomputer buses by R. Edwards 624
Microwave solid-state engineering in the UK by M.J. Howes 115
Miller, R.L.: New developments in computer control systems 577
Mind your language (letter) 431
Mineral-insulated cable — the inorganic solution by H. Baker and I.O. Wilson 268
Money, money, money by C.W. Turner 485
Moore, Glenis: An end to the paper chase? 554
Moore, Glenis: Caroline Herschel — seeker of comets 176
Moore, Glenis: Electronic publishing — a revolution in the printed word 695
Moore, Glenis: European spaceplanes — Hermes, Sanger or Hotol? 252
Moore, Glenis: Following the tracks of disease 496
Moore, Glenis: Ocean thermal energy conversion 649
Moore, Glenis: Scientific word processing 321
Moore, Glenis: Setting a date — dating techniques in archaeology 137
Moore, Glenis: UK robotics research — an overview 62
Moore, Glenis: Visual display units — cause for concern? 376
Moralee, D.: 30 years of professional video recording 726

N

Neutrinos by D.H. Perkins 433
Neutrinos and basic research (letter) 545
New products 74, 145, 207, 278, 343, 409, 471, 524, 589, 661, 749
Not so powerful waves (letter) 617
Nuttall, J.D.: Optical gyroscopes 703

O

Oakes, F.: Japan syndrome. Part 1: The new sunrise 580
Oakes, F.: Japan syndrome. Part 2: The Japanese manufacturer and his society 619
Oakes, F.: Japan syndrome. Part 3: The way ahead 735
Ocean thermal energy conversion by Glenis Moore 649
Ohm's Law (letters) 19, 172, 304, 545
Opacki, B.: Greek symbols in SI (letter) 233
Optical gyroscopes by J.D. Nuttall 703

P

Palles-Clark, P.: Classification of hazardous areas 262
Paper chase?, an end to the by Glenis Moore 554
Parkman, N. and Rudge, A.: Independent contract research 39
Pattie, Geoffrey, M.P.: Research: ingenuity to prosperity 25
Pauly, T.: Distributed control systems 573
Pearce, B.: Engineers and pay (letter) 233
Pegg, B.: Engineers and pay (letter) 368
Peppercorn, D.: R&D in a small company 68
Perkins, D.H.: Neutrinos 433
Peyton Jones, S.L.: GRIP — a parallel processor for functional languages 633
Pickering, S.: Turning light into day 447
Pollard, D.: Fuel cell development and prospects for the future 502
Pollitt, J.W.: Screw tightness (letter) 304
Power-station memories (letter) 20
Process control, future trends in by W.H. Simmonds 570
Process control strategies, industrial by A. Ingrey 567
Professional for a purpose 91
Project engineering, an accelerated experience course in by R. Carter and F. Cooke 101
Pursuit of knowledge (letter) 492

R

Radar technology — where next? by J. Ashby 445
R&D comments (letter) 233
R&D in a small company by D. Peppercorn 68
Ray, P.F.: The future nuclear reactors (letter) 686
Reflections of a computer pioneer by Roger Dettmer 717
Research, independent contract by N. Parkman and A. Rudge 39
Research: ingenuity to prosperity by Geoffrey Pattie, M.P. 25
Research, military, commercial exploitation of, by B. Herdan 59
RFI/EMC shielding in cable connector assemblies by A.B. Clewes 741
Richardson, P.: Standards of compliance (letter) 21
Roberts, D.H.: Continuing education and training — the need for action 539
Roberts, J.B.G.: Digital signal processing in the UK 183
Robertson, S.S.J.: Electrical safety — the need for expert advice 225
Robotics research, UK, — an overview by Glenis Moore 62
Robson, T.: High definition — the technical challenge 105
Rogers, L.R.: In place of efficiency (letter) 431
Rosen, P.: Distribution-system protection — the way ahead 333
Rudge, A. and Parkman, N.: (see Parkman) 39
Rudkin, T.: Upgraded signal source with improved performance and reliability 326
Russell, B.: Trends in the battery market 508

S

Safety-critical puddings by Bob Malcolm 291
Sanderson, F.C.: Generating costs (letter) 170
Satellites, communication, life expectancy of by Paul Gallois 547
Saving British science by R. Dettmer 55
Schofield, R.S.: Shocking practice (letter) 545
Scholes, N.P.: Generating costs (letter) 170
Schormans, J.: Electromagnetic waves and the ether (letter) 22
Schwarz, K.K.: Progress in quality and design 133
Screw tightness (letters) 304, 431, 491
Scroggie, M.G.: VDUs, in wartime (letter) 491
SDI technology — too far, too fast? by D. Clery 437
Seizing opportunities (letter) 304
Shabeer, M., McDonach, A. and Andonovic, I.: (see McDonach) 709
Shocking practice (letters) 431, 545
Signal source, upgraded, with improved performance and reliability by T. Rudkin 326
Silicon on insulator — the PCB on a chip by R. Dettmer 273
Silvanus Thompson — teacher, researcher, historian 173
Simmonds, W.H.: Future trends in process control 570
Sizewell: to B or not to B a PWR? by D. Lidgate 237
Software projects, controlling by Barbara A. Kitchenham 312
Space navigation and either (letter) 170
Special theory of relativity (letters) 21, 171
Standards and compliance (letters) 21
STE goes up the wall by R. Dettmer 637
Steed, J.C.: 'Computerspeak' (letter) 491
Stephens, C. and Sykes, P.: (see Sykes) 323
Stevens, S.A.: Advantages of wave power (letter) 431
Stevens, S.A.: Hi-tech lightning rod (letter) 687
Stevens, S.A.: R&D comments (letter) 233
Stevens, S.A.: Screw tightness (letter) 491
Stiff, B.: Engineers and pay (letter) 19
Strategic research in industry, the need for by M. Kelly 51
Sturley, K.R.: Faraday Lecture (letter) 169
Sturley, K.R.: Faraday Lecture (letter) 304
Supergrid condition assessment by R. Jackson, R. Gibbon, J. Ferguson and G. Lewis 641
Switchboard safety, greater — the manufacturer's response by R.V. McGhie 731
Sykes, P. and Stephens, C.: Forth — not a computer language but an engineering tool 323
Systematic approach to the design of systems by Paul Vernon 371

T

Taylor, G.: Young engineers and management (letter) 687
Taylor, M.: Choosing the right UPS 461
Terry, R.G.: Industrial decline and the status of engineers (letter) 169
Test and measurement — developments and trends by T. Leach 127
Thomas, D.B.: Links between universities and industry 44
Thomas, J.B.: Pursuit of knowledge (letter) 492
Three cheers (letter) 20
Three more cheers (letters) 170
Thynne, J.C.J.: Will we make it? 159
Tides (letter) 491
Townsend, F.E.: Engineers and pay (letter) 169
Transputer, applying the by P. Mattos 397
Turner, C.W.: Money, money, money 485
Turning night into day by S. Pickering 447
TV projection, 3D by R. Borner 379

U

UK research, the struture and funding of, — a statistical overview by B.R. Martin 31
Ulster, cheap energy for? by R. Dymond 653
Uninterruptible power supplies, changing trends in the design of by P. Barnett 457
Universities and industry, links between by D.B. Thomas 44
University funding for electrical engineering departments by D.E.N. Davies 611
UPS, choosing the right by M. Taylor 461
UPS systems — static or rotary? by W.P. Harris 465
Use of vehicle shells in a factory environment (letter) 172

V

VDUs and health (letter) 617
VDUs in wartime (letter) 491
Vernon, P.: Systemic approach to the design of sytems 371
Video recording, professional, 30 years of by D. Moralee 726
View from abroad (letter) 617
Visual display units — cause for concern? by Glenis Moore 376

W

Walmsley, P.: Young engineers and management 517
